

Schools = Happy Places

## School...

this word takes us to the

'most **cherished time** of our life',

when each day was nothing

less than a **celebration**.

There was a constant eagerness

(of the **free spirit** in us)

to move out of the monotonous,

boxed classrooms

# Time *Changes* Perceptions

So...How do we design a Space, where a Child spends the most important 16 years of his/ her Life???

Architecture is all about Sensory Experience & the design of Space is to celebrate these experiences to enhance the Human Spirit.

Designing stimulating learning environments for schools is a crucial aspect of education. A well-designed learning environment can have a significant impact on a student's ability to learn and engage with the material.

Designing for schools involves considering a range of factors, including lighting, color, flexibility, comfort, technology, and nature. By taking these elements into account, we can create a space that promotes engagement, creativity, and learning.

SO...

What's Next???

Let's GO to School...

We are part of the Universe...of the Earth...of the Nature...  
By default, all our designs make responsible use of Natural resources,  
appropriate building and energy systems.

pure space...  
...pure bliss
